

# Mihnea Ionita

Software Engineer

Braşov, Romania · [dev@imihnea.com](mailto:dev@imihnea.com) · [imihnea.com](https://imihnea.com) · [github.com/imihnea](https://github.com/imihnea) · [LinkedIn](#)

## Profile

Software engineer with nearly eight years of experience building and modernizing production software. Work spans established web platforms, commerce and payment flows, internal systems, data-backed tooling, mobile products, infrastructure, and delivery. Comfortable taking ownership across a product rather than staying within a single layer of the stack.

## Experience

---

**eRepublik Labs** — Software Engineer, B2B Contractor Sep 2019 – Present  
Remote / Bucharest, Romania

- Ship and maintain product work across eRepublik, War and Peace, and related internal systems, covering web applications, commerce, integrations, analytics, and operations.
- Modernized a large AngularJS and jQuery codebase incrementally with Vue and reusable components; replaced legacy build tooling and reduced local build times from 5–10 minutes to seconds.
- Delivered payment and checkout flows, live-event experiences, routing, experimentation, and analytics for products connected to web and mobile game ecosystems.
- Built an in-house newsletter platform using Amazon SES and BigQuery, alongside operational tools and automated workflows used by the team.
- Worked across Svelte applications, Node.js services, deployments, and Unity-adjacent integrations, collaborating with product, design, backend, data, and game teams.

**Deal Your Crypto** — Co-founder and Software Developer Dec 2018 – Sep 2019  
Bucharest, Romania

- Co-founded and built an early-stage crypto product, contributing across frontend, backend, product decisions, and day-to-day business operations.

**Bitcoin Romania** — Web Developer Intern Sep 2018 – Dec 2018  
Bucharest, Romania

## Selected Products

---

**SoftGrove Games** iOS and Android  
Designed, built, and published two mobile games, owning gameplay systems, monetization, leaderboards, consent flows, localization, store releases, and post-launch support.

**Dialogo** Next.js, TypeScript, PostgreSQL, Stripe  
Built a full-stack Romanian teletherapy platform with role-based accounts, therapist discovery, booking, payments, email workflows, and administrative tooling.

**Bearerine** Ghost, Stripe, infrastructure  
Built and maintain the membership website and supporting infrastructure for a full-time content creator, including subscriptions, integrations, email delivery, and hosting.

## Skills

---

**Languages and web:** JavaScript, TypeScript, HTML, CSS, Sass, SQL, responsive UI, accessibility, performance.

**Frameworks and systems:** Vue, React, Next.js, Svelte, AngularJS, Node.js, Express, PostgreSQL, MySQL, MongoDB, BigQuery, AWS SES, Docker, Stripe, Git, CI/CD.

**Product engineering:** Legacy modernization, payments and commerce, analytics, internal tooling, API integrations, mobile publishing, Unity integrations, AI-assisted development and agent-based workflows.

## Education

---

**Karel de Grote University of Applied Sciences** — Applied Computer Science 2020 – 2021  
**Politehnica University of Bucharest** — Electronics, Telecommunications and IT 2016 – 2019
