

Mihnea Ionita

Software Engineer

Braşov, Romania · dev@imihnea.com · imihnea.com · github.com/imihnea · [LinkedIn](#)

Summary

Software engineer with eight years of experience building and modernizing production products. Work spans established web platforms, commerce and payment flows, internal systems, data-backed tooling, backend integrations, infrastructure, and independently published mobile applications. Comfortable owning a product across layers and carrying work through to production.

Experience

eRepublik Labs — Software Engineer, B2B Contractor

Sep 2019 – Present · Remote / Bucharest, Romania

- Ship and maintain production work across eRepublik, War and Peace, and internal systems, covering web applications, commerce, integrations, analytics, and operations.
- Modernized a large AngularJS and jQuery codebase incrementally with Vue and reusable components; replaced legacy build tooling and reduced local build times from 5–10 minutes to seconds.
- Delivered Svelte and Vite commerce applications, checkout and payment flows, routing, limited-time event storefronts, experimentation, and analytics for web and mobile game ecosystems.
- Built an in-house newsletter platform using Amazon SES and BigQuery, alongside operational tools and automated workflows used by the team.
- Worked across Node.js services, deployments, and Unity integrations, collaborating with product, design, backend, data, and game teams.

Deal Your Crypto — Co-founder and Software Developer

Dec 2018 – Sep 2019 · Bucharest, Romania

- Co-founded and developed a marketplace using Node.js, Express, MongoDB, EJS, Docker, and Elasticsearch, including search, accounts, messaging, transaction, notification, and administration workflows.
- Owned frontend and backend delivery alongside product decisions and day-to-day business operations.

Bitcoin Romania — Web Developer Intern

Sep 2018 – Dec 2018 · Bucharest, Romania

Supported web development and maintenance for a Romanian cryptocurrency exchange.

Selected Products

SoftGrove Games — Petalpop and Matchjong Gardens

iOS, Android, App Store, Google Play

Independently designed, built, and published two mobile puzzle games, owning gameplay, progression, monetization, leaderboards, localization, store releases, and post-launch support. Matchjong Gardens includes a 10,000-level campaign and 44-language localization.

Dialogo

Next.js, React, TypeScript, PostgreSQL, Supabase, Stripe

Built a full-stack Romanian teletherapy platform with role-based accounts, therapist discovery, scheduling, payments, secure video sessions, email workflows, and administrative tooling.

Technical Skills

Languages: TypeScript, JavaScript, SQL, HTML, CSS, Sass.

Frontend: Vue, React, Next.js, Svelte, AngularJS, responsive design, accessibility, performance.

Backend and data: Node.js, Express, PostgreSQL, MySQL, MongoDB, BigQuery, REST APIs.

Cloud and delivery: AWS SES, Docker, Git, CI/CD, Stripe, Supabase, Vercel, Netlify, App Store, Google Play, Unity integrations.

Ways of working: Product engineering, legacy modernization, commerce, analytics, internal tooling, AI-assisted development and agent workflows.

Education

Karel de Grote University of Applied Sciences — Coursework in Applied Computer Science · 2020 – 2021

Politehnica University of Bucharest — Coursework in Electronics, Telecommunications and IT · 2016 – 2019
